

SERVICE OVERVIEW: TECHMARRK™ ARCHITECTURE REVIEW

In a nutshell, a TechmArrk™ review is:

- Typically 5, 10 or 15 days depending on size of project and level of detail required
- Flexible and adaptable to different contexts, needs and budgets
- Tightly time-boxed
- Ideal for organisations needing a fresh pair of expert eyes looking at their technology stack and architecture

TechmArrk™ is a rapid, adaptable and collaborative architecture review.

The process is lightweight, time-boxed and iterative; incorporating regular stand-up calls to review findings and priorities. The review concludes with a comprehensive report, complete with findings, recommendations and time-bound action points.

Tailored to the specifics of the organisation, budget and the level of detail required, TechmArrk™ typical durations are 5, 10 or 15 days, and includes a full-stack investigation and selective 'deep dive' code reviews.

Depending on customer requirements, typical outcomes include:

- Tailor-made technical report with corrective actions
- Presentation of key findings and recommendations
- Regular stand-up calls with your consultant
- Follow up calls on specific areas
- Scheduled future reviews to monitor progress

The review provides expert analysis and insight into a variety of key areas, including:

- Scalability, availability and performance
- Use of automated code quality tools
- Test coverage and test quality
- Maintainability
- Technical debt
- Security
- API

A TYPICAL 5-DAY SCHEDULE

DAY ONE	DAY TWO	DAY THREE	DAY FOUR	DAY FIVE
Introductions	Stand-up Call	Deep Dive(s) Architecture Review	Stand-up Call	Discuss & Approve Findings
Scene Setting	Automated Reviews		Test Inspection
